2020 Census: In-Field Address Canvassing (IFAC) Viewer

Information

This viewer was developed to allow users to explore the **In-Field Address Canvassing (IFAC)** workload areas. Users can see the percentage of basic collection units (BCUs) and housing units (HUs) in the Self-Response Type of Enumeration Areas (TEA 1) by clicking on a County, Census Tract, or Congressional District. Learn how to interact with this tool by clicking the Application Help icon in the toolbar above.

The In-Field Address Canvassing workload areas are shown in green on the map.

The Address Canvassing operation serves two purposes:

- Deliver a complete and accurate address list and spatial database for enumeration.
- Determine the type and address characteristics for each living quarter.

Specifically, this operation implements both in-office and in-field methods to maintain and update the United States Census Bureau's address list in advance of the 2020 Census enumeration. The Census Bureau needs the address and physical location of each living quarter in the United States
