FIRST QUARTER CRIME STATISTICS

Calls for Service by Month
Comparison of 2021 to 2000-2020

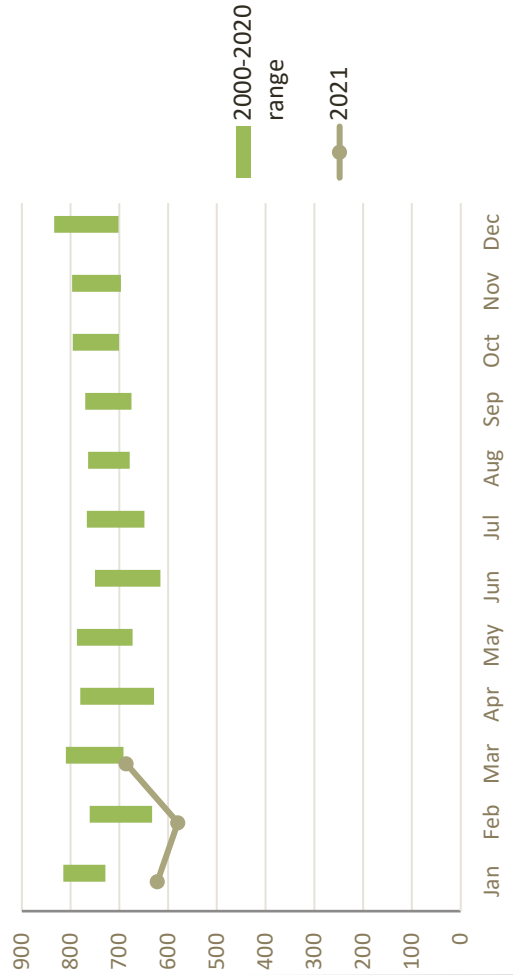

January and February totals in both calls for service and case reports were lower than usual, with March at the bottom of the expected range compared to past years.

While Burglary 1 and 2 (primarily commercial burglary) went up in February, numbers in January and March were in normal range.

Of note is zero robbery reports in February, which we haven't seen in at least 15 years of tracking.

[These charts show the current year (line) as compared to previous years (rectangles). This gives perspective as to a normal range as calculated over the past years.]

Case Reports by Month
Comparison of 2021 to 2000-2020
