 - Homicide Investigation
 - VIIT Investigation
- Flock Automated License Plate Reader Cameras
- Public Disclosure Requests
- Emergency Management

THIRD QUARTER CRIME STATISTICS

Calls for Service by Month
Comparison of 2023 to 2000-2022

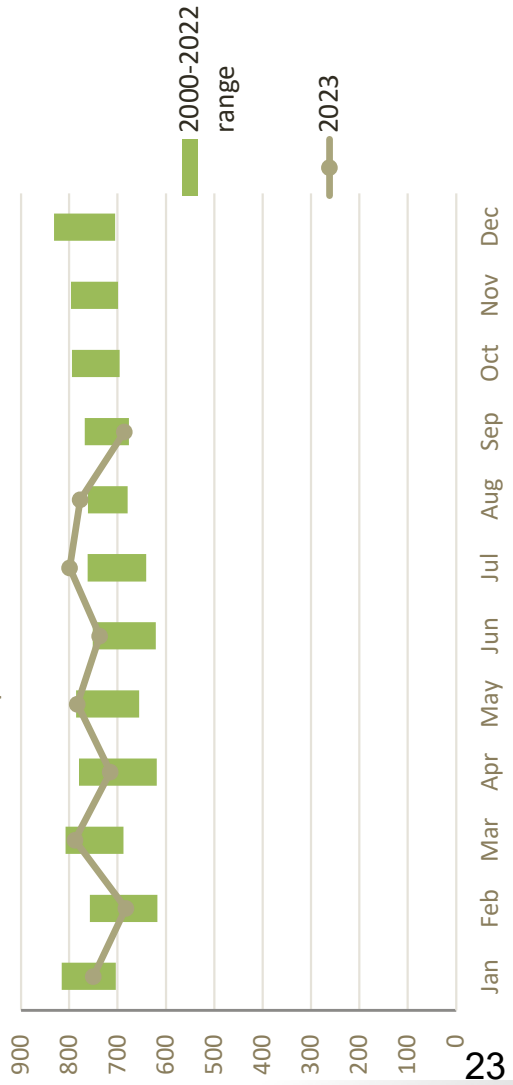

Calls for service remain in the expected range based on historical numbers.

Case reports (online and officer-created) are also in the expected ranges.

Most crime types are lower than the average per month last year, but stolen vehicle recoveries are up, heavily due to the license plate reader (LPR) information available to officers. Almost 60% of stolen vehicle recovery calls are officer-initiated over the last three months - last year around 30% of stolen vehicle recovery calls in the same time period were officer-initiated. The LPR cameras are helping officers return stolen vehicles to victims.

[These charts show the current year (line) as compared to previous years (rectangles). This gives perspective as to a normal range as calculated over the past years.]
